

SRS Group provides comprehensive services related to intermediation in taking over the obligations of battery and accumulator importers. Our services include collecting, transporting, recycling, waste recovery, reporting, and conducting environmental education campaigns. Through the introduction of innovative solutions and meeting customer expectations, we actively contribute to environmental improvement.

The objectives of the Environmental Policy focus on delivering environmentally friendly services while considering technological advancements, customer demands, and societal expectations.

The overriding goals in the implementation of the Environmental Policy are:

- acting to reduce and prevent environmental pollution, minimizing the negative impact on the environment and being an integrator of the Circular Economy (CE),
- acting in the field of environmental protection based on legal acts and dealing with used batteries and accumulators using modern processing technologies (BAT),
- complying with the timely fulfillment of obligations and services provided to our customers,
- complying with applicable legal requirements regarding our operations and environmental protection,
- setting environmental goals and tasks.

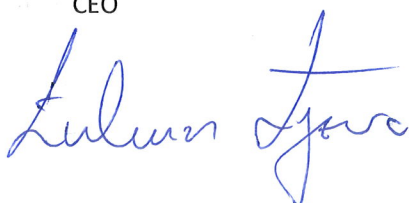

We intend to achieve the above goals through:

- correct identification of environmental aspects of the Company's operations and determination of their impact on the environment,
- ensuring the minimization of the consumption of natural resources, including water, raw materials, and energy, and the continual reduction of emissions of pollutants, particularly waste into the environment,
- continuously improving the processes related to battery and accumulator recycling services, as well as ensuring the proper operation of transportation, machinery, and equipment,
- continuously enhancing qualifications, awareness, and fostering appropriate attitudes among employees, subcontractors, and clients of the SRS Group,
- carrying out impactful educational campaigns aimed at raising public awareness regarding waste batteries, accumulators, and waste within the Circular Economy (CE),
- continuously enhancing our commitments by aligning them with the requirements of the PN-EN ISO 14001:2015 standard.

The policy is communicated to all persons working for or on behalf of SRS Group Sp. z o. o.
